Indoor Volleyball Statistics Feeds

We package our comprehensive stats collection into the following feeds, each focused on serving specific information needs:

Competitor Profile - Returns information for a competitor/team.

Competitor Results - Returns a list of results for a given competitor/team.

Competitor Schedule - Returns a list of scheduled matches for a given competitor/team.

Daily Results - Returns a list of match results for a given date: yyyy-mm-dd

Daily Schedule - Returns a list of scheduled matches for a given date: yyyy-mm-dd

Head to Head - Compares past results and schedules upcoming matches given two team IDs.

Seasons - Displays a listing of seasons with respective IDs. Season IDs can be interchanged with tournament IDs to retrieve historical data.

Sport Event Probabilities - Returns the pre-match 3-way probabilities of winning for both teams. Expires once the match is live.

Sport Event Timeline - Displays information for a specific match including a timeline of events, live (assuming coverage levels dictate that it is live) as well as match and player statistics.

Tournament Info - Provides information pertaining to a given tournament or season.

Tournament List - Lists all tournaments in the package.

Tournament Live Standings - Returns the live standings for a given tournament or season. This data changes in relation to events occurring in currently live matches.

Tournament Results - Returns a list of results for a given tournament or season.

Tournament Schedule - Returns a list of scheduled matches for a given tournament or season.

Tournament Standings - Returns the current standings for a given tournament or season.

Updated 09.18.18

Coverage Levels

Coverage level information for a particular tournament can be found in the Tournament Info endpoint. Match level coverage information is found in the Sport Event Timeline endpoint.

From time to time, coverage is updated. In order keep up to date with the latest coverage levels please check the change log: http://developer.sportradar.us/change_log and also refer to the Sportradar coverage document published here: https://www.sportradar.com/wp-content/uploads/sites/5/2014/12/Sportradar_Coverage.pdf

Language Support

We provide support for a large set of languages. The language support primarily affects names of players, teams, tournaments etc. Different languages are obtained through different endpoints where the only difference is the language part of the path. The language part is any valid ISO-646 language code. For languages we don't provide specific translations for we return back the names in English.

Q: What is the Date format?

A: When we present date only values we present these in the ISO 8601 standard format.
ex: 2013-04-03

We use these for attributes that have date and no time (such as birthdate). For more information:
https://en.wikipedia.org/wiki/ISO_8601

Q: What time zone are the date time fields presented in?

A: All of our DateTime attributes are in UTC, presented in the ISO 8601 standard format.

ex: 2013-04-03T18:15:00+00:00

For more information: https://en.wikipedia.org/wiki/ISO_8601

Q: What are the valid match status values?

A: Here are the valid match status values and their definitions:

- not_started – The match is scheduled to be played
- live – The match is currently in progress
- postponed – The match has been postponed to a future date
- delayed – The match has been temporarily delayed and will be continued
- canceled – The match has been canceled and will not be played
- ended – The match is over
- closed – The match results have been confirmed.

Q: How do I access past seasons' result and stats?

A: *TournamentID* and *SeasonID* are interchangeable. To access a previous season, first interrogate the *competitions/[tournamentID]/seasons* endpoint to ascertain the required *seasonID*, then use that *seasonID* in place of the *tournamentID* for any of the following endpoints:

- *Competitions/seasonID/results*
- *Competitions/seasonID/schedule*
- *Competitions/seasonID/teams/teamID/statistics*
- *Competitions/seasonID/standings*

Q: What are the valid outcomes for probabilities?

A: Here are the valid outcome probabilities:

- home_team_winner
- away_team_winner

Q: How do I find out the coverage for a particular match?

A: Find the node called "coverage_info" in the Sport Event Timeline endpoint. The attribute *live_coverage* reports whether Sportradar has live coverage of the match or not.

Q: Why do different groups have coverage information for a tournament?

A: The notion of “groups” is versatile and is used to distinguish between playoffs, and our tournaments structures and is therefore necessary to describe coverage at a group level for consistency.

Q: What are the possible event types logged?

A: Here are all of the possible event types we log:

- Match started
- Score change
- Match ended

Q: What are the valid tournament types?

A: Here are the valid tournament types:

- group
- playoff

Q: What are markets and what are the different markets?

A: Markets is something you can bet on that we provide probabilities for. Over time we intend to provide more and more markets in the API. Currently the only market we provide is 3-way (will the home team win? Or the away team? Or will it be a draw?)

Q: What are the possible outcomes?

A: Different markets have different outcomes. The available markets are currently:

- home_team_winner
- away_team_winner
