NASCAR Statistics Feeds

We package our comprehensive stats collection into the following feeds, each focused on serving specific information needs:

Daily Change Log – information on any changes made to race information, race results, driver information, track information, or standings

Driver Standings – provides detailed driver standings and season statistics, including starting position, finishing position, and laps completed averages

Drivers – provides detailed driver information, including information regarding their cars and teams

Entry List – provides information regarding all drivers scheduled to attempt to qualify for a race

Manufacturer Standings – provides standings information for manufacturers within the series

Owner Standings – provides standings information for car owners within the series

Qualifying Leaderboard – provides qualifying information for all drivers entered in the field including fastest speed, time, and finish position

Race Leaderboard– provides detailed information concerning a drivers race performance during and after the race

Rookie Standings – provides the same level of detail as the driver standings feed, but only rookie drivers appear

Schedule – provides detailed information regarding all events associated with the series' season

Starting Grid – provides the official start order of the race

Tracks – provides detailed information regarding all tracks within the Sprint Cup, Xfinity, and Camping World race series'

Frequently Asked Questions

Q: What are the race statuses I can expect to see in the feeds and their definitions?

A: Here are the race statuses and their descriptions:

- scheduled – The race is scheduled to occur.
- initialized – We are ready to begin recording actions against the scheduled race.
- practice – We are currently in the practice round.
- qualifying – We are currently in the qualifying round.
- prerace – The qualifying round is over, the main race has not begun.
- inprogress – The race is in progress.
- complete – The race is over, we are in the process of validating the race statistics.
- closed – The race is over and the statistics have been validated.
- delayed – The race has been delayed.
- canceled – The race has been canceled.
- rescheduled – The race has been rescheduled.
- maintenance – The closed race has been reopened to correct one or more statistics.
- warmup – The scheduled race is set to take place and will begin soon.

Q: What are the race conditions I can expect to see in the feeds and their definitions?

A: Here are the race conditions and their descriptions:

- normal – The race is under normal racing conditions.
- accident_caution – The race is under caution due to an accident.
- conditions_caution – The race is under caution due to track conditions.
- weather_caution – The race is under caution due to weather conditions.
- accident_suspended – The race has been suspended due to an accident.
- conditions_suspended – The race has been suspended due to track conditions.
- weather_suspended – The race has been suspended due to weather conditions.
- accident_shortened – The race has been shortened due to an accident.
- conditions_shortened – The race has been shortened due to track conditions.
- weather_shortened – The race has been shortened due to weather conditions.
- pitstops – The race is in progress, but all cars are in the pits.

Q: What are the possible driver statuses for the practice, qualifying, and race session that I can expect to see in the feeds and their definitions?

A: We have 2 different sets of driver statuses: statuses that are used during the session and statuses used post session.

Here are the live race driver statuses and their descriptions:

- ontrack – The driver is currently active in the session.
- garage – The driver is currently in the garage.
- accident – The driver is currently off the track, or ended his/her session due to an accident.

Here are the post race driver statuses and their descriptions:

- garage – The driver ended the session in the garage for an unknown reason.
- running – The driver ended the session running.
- engine – The driver ended the session due to engine issues.

vibration – The driver ended the session due to vibration issues.
brakes – The driver ended the session due to a brake issue.
fuelpump – The driver ended the session due to issue with the fuel pump.
spindle – The driver ended the session due to an issues with the spindle.
transmission – The driver ended the session due to a transmission issue.
handling – The driver ended the session due to handling issues.
ignition – The driver ended the session due to an ignition issue.
oilleak – The driver ended the session due to an oil leak.
overheating – The driver ended the session due to an overheating issue.
electrical – The driver ended the session due to an electrical issue.
axle – The driver ended the session due to an issue with an axle.
clutch – The driver ended the session due to an issue with the clutch.
suspension - The driver ended the session due to suspension issues.
reargear – The driver ended the session due to rear gear issues.
dnq – The driver did not qualify for the race.
withdrew – The driver has withdrawn.

Q: What time zone are the date time fields presented in?

A: All of our DateTime attributes are in UTC, presented in the ISO 8601 standard format.

ex: 2013-04-03T18:15:00+00:00

For more information: https://en.wikipedia.org/wiki/ISO_8601

Q: Why is the Qualifying Leaderboard empty for the Camping World race at Eldora?

A: For the Camping World Truck race at Eldora, the qualifying feed will be empty, as qualifying is handled differently at that track. The starting grid will not be finalized until 15 minutes prior to the scheduled race start and will be available in the Starting Grid feed.
